- 6 lbs (dry)
- 110 volt
- 20 gph flow rate*
- 3.5 pad psi*
- 5 ft. Insulated Hose
- *approximate

Adroit's Cold Therapy Pads (Soft-Temp®) have nearly double the patient contact area of ordinary pads. They are also made with polyurethane, a rubber like material that remains flexible even if frozen. Our cold therapy pads are also insulated with a thin layer of foam on the outside to prevent condensation and help retain cooling energy. Velcro straps are included to securely fasten the pads wherever needed on the patient. All cold pads are available sterile or non-sterile. Accessories include a cooler cart with storage basket and replacement hoses.
